EXPERIENCE

Full Stack Software Engineer

Dec 2024 – Present

FloQast

New York, NY

- Led a cross-team integration project to enable FloQast's amortization/depreciation module to send financial data to JEM, owning architecture decisions and coordinating a team of 4 engineers to deliver the API pipeline
- Co-lead multiple integration workstreams across product boundaries, driving technical alignment between teams and ensuring consistent data modeling for financial schedule calculations
- Build and maintain the amortization/depreciation scheduling engine that pulls client financial data, computes schedules, and renders interactive views used by accounting teams during the month-end close
- Resolve production defects and ship UI improvements across the platform using TypeScript, React, MongoDB, and AWS, reducing user-reported issues and improving workflow reliability

Software Engineer Intern

May 2023 – May 2024

Rose Ventures

Terre Haute, IN

- Developed and extended full-stack client applications using React, TypeScript, C#, and SQL, delivering new pages and features across multiple client engagements
- Built sortable, filterable data table components with the DevExtreme library, directly addressing client feedback and improving data navigation workflows
- Identified and resolved critical production bugs, preventing downtime and ensuring platform stability across deployments
- Collaborated in Agile sprints with project managers and clients to translate business requirements into shippable technical features

PROJECTS

Rose Data | *TypeScript, Angular, PostgreSQL, GitHub Actions*

- Developed a class scheduling platform for students and staff, building Angular components that query a PostgreSQL backend to display and manage four-year academic plans
- Configured GitHub Actions CI/CD pipelines to automate testing and deployment, reducing manual release overhead

NetStrike | *C#, Unity*

- Developed a multiplayer 3D first-person shooter in Unity with local networking, including a custom map modeled after a campus building
- Implemented local hosting and connection systems using external networking libraries to enable real-time multiplayer gameplay

Rubik's Cube Simulator | *JavaScript, WebGL*

- Built an interactive 3D Rubik's Cube using raw WebGL with custom rendering pipeline, rotation animations, and a randomized scramble generator

EDUCATION

Bachelor of Science, Computer Science

May 2024

Rose-Hulman Institute of Technology

Terre Haute, IN

GPA: 3.42 | Cum Laude | Dean's List

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C#, C++, HTML, CSS

Frameworks: React, React Native, Angular, Node.js, Bootstrap

Tools & Infrastructure: AWS, MongoDB, PostgreSQL, MySQL, Git, GitHub Actions, Jira, Figma, Unity

Other: Korean (fluent)
